SANITATION

SOUTH AFRICAN
LOCAL
GOVERNMENT
ASSOCIATION
(SALGA)

**JAN
VENTER**

CHIEF EXECUTIVE
OFFICER

SOUTH AFRICAN
PLASTIC PIPE
MANUFACTURERS
ASSOCIATION
(SAPPMA)

South Africa's water and sanitation sector underpins economic growth, health, and sustainability — yet remains an untapped industrial opportunity. From pipes and valves to pumps, meters, and treatment chemicals, it relies on a manufacturing base that could play a stronger role in localisation and resilience.

The LSF-commissioned study provides a much-needed mapping of local capabilities, import reliance, and market structure, highlighting both constraints and opportunities for aligning public procurement, infrastructure investment, and industry development.

This roundtable convenes policymakers, manufacturers, and public entities to explore practical steps to strengthen domestic production and build a more competitive, sustainable sector.
